

## Details on the AO for Visual Psychophysics Workshop (*very tentative*)

This workshop will be held at the UC Berkeley School of Optometry on March 26 and 27, 2007. The meeting will start early on Monday, so out-of-towners should plan to arrive on Sunday.

- There will be a series of informal talks on ongoing activities using AO for psychophysics (*Qiang Yang, Ethan Rossi, Heidi Hofer?, Stevenson, Carroll*).
- Demonstrations of AO psychophysics technology in Roorda Lab (*Roorda Lab members*).
- A series of talks on potential experiments that can take advantage of AO (*Levi, Stevenson, Arathorn*).
- Open discussions

The UCB part of the meeting will end on Tuesday 3/27 at noon. On Tuesday afternoon, there will be a series of plenary talks and CFAO overviews at UC Santa Cruz, where other workshops are being held concurrently with our own. There will be dinner and social events that Tuesday evening so all attendees are encouraged to attend, particularly CFAO members. CFAO will cover costs incurred for the UCSC portion of the trip.

Details on local accommodation can be found at:
